
Building a Trail Bridge

Posted by lottie - 2008/07/02 11:41

I would like to make a trail bridge but want to make sure it is strong enough. I have a pallet I was going to use as a base but not sure where to go from there!

We used 3 pallets and wood you use for decking,so far so good.

Did you nail the decking to the top and bottom of the pallets or just the top??!!

Depends on how sturdy your pallets are, but generally the top. As long as very strong you should be ok.
