Hi does anyone out there use the parelli western saddle. If so how are you doing with it. I am considering buying one and would love to know what the low down is. Also would be great to see and sit in one before hand.

Anyone use parelli methods???)

Hi ya,

if you sign up to intelligent horsemanship site forum you will find loads of feedback on there.....lots of parelli people on there. Sorry I don't have one I can comment on....Jude.

Hi,

I was thinking of stocking them. They are built on Equiflex trees but one saddle does not fit all! I know Parelli use a pad with it but that would be like putting a thick pair of socks under a pair of shoes that are too narrow. It will still need to be fitted properly, no matter what you might be told. The same trees are also in the Equiflex treed saddles, which are cheaper but made by the same company as the Parelli saddle. If you need to know any more - please let me know. :)

Hello, thanks for reply. Be great if you find out some info in august. I think they be sending some western saddles from america so perhaps I'll have to go and take a look as well.  
Gill

Hi, Quick update, Parelli will defenatly have saddles at the NEC next weekend so i will get some info.

Also have you seen the new Parelli Saddle DVD? go to [www.parellicollection.com](http://www.parellicollection.com) this has loads of info on the saddle and you and see them in action. also shows how to fit them.
