## No Event Calendar

Posted by admin - 2006/07/20 12:45

---

Due to recent hackers activity to the site, I have had to disable the events calendar. My apologies to those who have entered events.

By exploiting a vulnerability in the event calendar someone had twice hacked the site and promoted their own political agenda and religious beliefs. I apologise for any offense that may have been associated with this.

As soon as I can be sure of a fix for this I will re-enable the event listing, if I am not able to do this within the next 48 hours I will source a new method for you to enter your events.

I guess it was just a matter of time before this sort of thing happened!!! :(

## Event Calendar Fixed but...!

Posted by admin - 2006/07/20 16:13

---

The event calendar has been fixed and hopefully will keep the hackers out. :evil:

Unfortunately we have lost all the events that had been entered, so could everyone who has an upcoming event please reenter for the benefit of all our users.

Sorry for this inconvenience but it was one of those things that was bound to happen and I had to make sure that no data had been compromised.

For the time being there will be no upcoming events listing on the home page as this has problems with the new version of the calendar. But there will soon be a mini calendar to watch!!:whistle:

Thanks-turned on after work and couldn't get in guess you were busy working on it.

One little query is it possible to put the dates the other way round? i.e 20/7/2006 ?  
My old bones find 2006/07/20 a bit confusing!:)
