
Saddle - How far forward??

Posted by boova - 2008/04/24 09:04

Finally managed to get a saddle that seems to fit my boy properly but when i put it on him the positioning that he offers seems too far forward.

I have attached a pic and would be grateful of some help.

Hi,

Is it treed or treeless? Cannot really see in photos as they are too small. Can you post a larger one or email one over? :)

Beautiful horsey :kiss:

Hi Maria

It is a treed saddle. I borrowed a barefoot treeless and just couldn't get on with it :S

Hopefully this will come out a bit bigger, if not I will email you.

Hi,

Not everyone gets on with them, some love them and some hate them.

Does the treed one have plenty of room over his shoulders to allow him to grow. He is young isn't he? That photo is too blurry to see clearly - so please do email photos. :)
